

Stacey Mantha, M.Sc., is the Director, Office of Pathogen Security in the Centre for Biosecurity (CB) at the Public Health Agency of Canada (PHAC). In her role, Ms. Mantha is responsible for developing and maintaining strategic partnerships with international and national partners to strengthen biosafety and biosecurity in Canada and globally, as well as the Agency's laboratory biosecurity program, border initiatives and systems integration to support Centre for Biosecurity programs.

Prior to taking on this role she held various positions within the Centre for Biosecurity (formerly the Pathogen Regulation Directorate), although, she has always maintained close ties with both the policy and operational aspects of CB's legislative mandate.

Ms. Mantha began her career with the Canadian Federal Public Service at the Bureau of Microbial Hazards in the Food Directorate at Health Canada where she worked closely with both the Research and Evaluation Divisions in a variety of roles in regards to the microbiological safety of foods. Stacey received an undergraduate degree in Biology and Biotechnology from Carleton University, Canada and a M.Sc. in Microbiology and Immunology from Queen's University, Canada.
